The Commission expressed several concerns about the proposed policy changes, including but not limited to:
- The composition, roles and responsibilities of the TAC need to be more clearly defined
- Would like to see more technology defined and encouraged as part of the policy and procedures (i.e. GIS mapping)
- Concerned with the cost implications for the City since no substantive financial analysis has been completed
- Timeline needs to be developed for the implementation of the TAC and volunteer engagement
- Does not appear to address many of the NRC’s subcommittee recommendations
- The proposed process appears to increase overhead and become more bureaucratic
