AIR GAPS FOR DISHWASHERS AND REVERSE OSMOSIS

801.0 Indirect Wastes

**801.2 Air gap or Air break required.** Indirect waste piping shall discharge into the building drainage system through an air gap or air break as set forth in this code. Where a drainage Air gap is required by this code, the minimum vertical distance as measured from the lowest point of the indirect waste pipe or the fixture outlet to the flood-level rim of the receptor shall be not less than one (1) inch. (If Recessed Sink Air Gap Must Be 1” Above Counter Top)
