# SPRINKLERS VALVES

- Metallic piping between water supply and **metallic sprinkler shut off** valve must be of similar metals (cannot use galvanized iron with copper piping) brass ok with galvanized iron or copper.
- Where exposed to sunlight, plastic pipe (PVC) shall be wrapped with at least 0.040" (1.0 mm) of tape or otherwise protected from UV degradation.
- No valves are allowed downstream of the atmospheric anti-siphon valve.
- Timers should be installed per manufactures installation instructions and the California Electric Code.

Hose Bib Back Flow Device

Hose Bib with Back Flow Device Installed

Note: All exterior receptacles must be tamper and weather resistant type, GFCI protected and have an enclosure that is weather proof whether or not the attachment plug is installed.
