Rebuttal to Argument Against Measure B

Yes on B will approve the most environmentally sustainable research campus in the country and it’s a key reason we’re wholeheartedly supporting the Davis Innovation & Sustainability Campus (DISC).

Proposals for innovation centers that build on UC Davis' international reputation have come and gone, but DISC is the first to meet the community's demand for a project that makes a difference for the planet and for Davis residents.

Yes on B will approve:

- $77.5 million in roadway fees to correct and improve Mace Boulevard and address other transportation needs.
- The first project of its kind in the nation powered by 100% clean, renewable energy.
- Davis' single biggest investment in affordable housing – many workers will walk or bike to work.
- Carbon neutrality over the 20 - 30-year project buildout.
- $250,000 annually for transit, shuttles to Amtrak, roadway repairs, and bicycle/pedestrian safety.
- 49 acres of parks and open space including new habitat for burrowing owls.

DISC will create green jobs and pump millions of dollars into the community, helping local small businesses, and assuring Davis’ vitality and quality of life for years to come.

Yes on B will provide significant new funding for our schools and create new student internship opportunities, stimulating our local youth entering the job market.

Yes on B will fulfill Davis' decades-long dream of creating a place where cutting-edge, clean-technology businesses will work in harmony with UC Davis.

Join our broad coalition of current and former elected officials, educators, seniors, students, and local civic and business leaders, Vote Yes on B.
